HARDY FAST GROWING EVERGREENS FOR WINDBREAK

The best evergreens to use as a windbreak are the Scotch Pine, Austrian Pine, White Spruce. The larger sizes are more easily established.

A RARE TREE—DAWN REDWOOD

E1-32 METASEQUOIA GLYPOSTROBOIDES

Before 1945 this tree was known only from fossils but was discovered still growing in China that year. While related to the evergreen conifers, it drops its leaves. It is fast growing, apparently perfectly hardy in most of the United States, and a real addition to our gardens. 2½" pot plants.

2 GLOBE ARBORVITAE 2 PFITZER JUNIPER **$2.69**
6 strong pot grown baby Evergreens.

HARDY BOXWOODS

While the North Carolina, Virginia and Tennessee area is noted for its aged Boxwoods, other parts of the country, even well into Michigan and New York, can and do raise beautiful ornamental specimens outdoors. We have tested the following kinds through several severe winters and find them quite satisfactory. 2½ inch pot plants.

60c each 3 for $1.69 10 for $5.50

T E1-6 **KENOVA BOXWOOD**—A fast growing variety from Kenova Valley, West Va. Makes a bushy compact rounded specimen without trimming.

T E20 **NOBLET'S BOXWOOD**—Our neighbor, the Noblets, have this Boxwood growing in the open at the top of a windy hill. It has not been harmed in the coldest winters here. Compact, small leaved.

T E1-7 **KOREAN BOXWOOD**—The hardiest of all Boxwoods. Smaller leaves, more open growth. Will not be injured in coldest weather.

BROAD LEAVED EVERGREENS

These are the trees and shrubs with large evergreen leaves such as the Rhododendrons and Hollies. They are greatly prized for their winter "green", and showy fruit and flowers at other times of the year. The varieties we have selected are reliably hardy except perhaps in the most northern states of the country.

HARDY AZALEAS

The Azaleas and Rhododendrons belong to the large group of ericaceous plants that require an acid lime-free soil for success. Unless your soil is acid, peat moss or hardwood leaf mold with a mulching of aluminum sulphate must be added. Azaleas do best in a sunny or semi-shaded location.

2-3 YEAR OLD AZALEAS

Well-branched with flower buds intact. These larger sizes are best for Fall planting.

$1.25 EACH 5 FOR $6.00

E1-31 **GERARDIANA**—Showy flowers of salmon pink. Quite large and long lasting. Vuykiana strain.

E68 **OTHELLO**—Large bright orange red, will not fade in the sun. Kaempferi type.

E25 **JOHN CAIRNS**—Deepest blood-red flowers on thrifty plants. Kaempferi type.

E69 **PALESTRINA**—Snow white flowers on rather tall bushes, a bit later than the others. Vuykiana type.

E22 **ROYALTY**—Thrifty plants covered with regal dark purple flowers. A Gable Hybrid.

1 Each of E1-31, E68, E25, E69, E22.

E1-12 PIERIS JAPONICA—ANDROMEDA

A most beautiful broadleaved evergreen. In summer the color of the foliage is always changing from red to pale green, then dark green. The flower buds form for next spring in light green graceful racemes. Lily-of-the-valley-like flowers bloom with first warm spell. Flowers last as long as 6 weeks. Grows well in sun or shade. Requires acid soil.

SPRAYING FRUIT

To be successful all fruit trees must be sprayed. Your State Department of Agriculture will be glad to furnish you with the proper spraying program for your particular locality.

Please write to them and request such information.

PLANTING AND FERTILIZING FRUIT TREES

Most any good soil is suitable for fruit trees. For success, select a well-drained location where water will not stand summer or winter. Dressing of well-rotted manure and regular feedings with a complete plant fertilizer after the first year are greatly beneficial.

GROUP FR60

HOME DWARF FRUIT ORCHARD

4 TREES

2 apples, 1 peach, 1 pear.

only **$10.00**

NOTE

Fruit trees are dwarfed by grafting and budding on slow maturing root stocks. Be sure the top graft or bud —identified by a slight bulge or crook—is planted at least 1 to 2 inches above ground level. If this is not done, the desired variety will produce its own roots and will no longer be dwarfed.

BEAUTIFUL HARDY LILIES

HEMEROCALLIS—DAYLILIES

Almost unbelievable new colors, blends, giant flowers, and graceful sprays are common in these newer hybrids.

Hardy anywhere in the U.S.A. they thrive in full sun to partial shade, bloom from late May till frost, using several varieties, and are extremely thrifty and easy to grow. Remember, we ship a large blooming size plant with abundant roots attached. We have selected the following varieties as really outstanding.

ACRES OF MUMS

60 KINDS

Over 16,000 large clumps of hardy mums full of bud and bloom! See them in bloom. Bring your basket and shovels, dig what you want.

Ready usually in early September. Too large to ship—Sold only at our nursery. Mums are in best bloom in early October, but the early varieties start to show color in early September.

HARDY PERENNIAL FLOWERS

Rocknoll's Hardy Perennials are all grown in the open field and are at least two years old. Our soil is just ordinary farm soil such as produces corn or alfalfa. Our temperatures range from —20°F. to +100°F. Some few varieties are best grown in pots to assure successful transplanting.

P47 **PACIFIC HYBRID**

DELPHINIUM

We cannot adequately describe the elegance and beauty of this marvelous new strain of hybrid Delphinium. Giant stalks bearing enormous flower spikes. Individual florets are each perfect and exceptionally large, measuring as much as 2½ inches across. Because they are hybrids, we cannot guarantee what shade the plants will boom, but they run the range of blues, lavenders and mixed shades.
Plant 12 to 18 inches apart in good garden soil. Keep well watered and fertilized, with shallow cultivation. These plants bloomed this summer.

ROCKNOLL'S GIANT PANSIES

PLANT THIS FALL FOR EARLY SPRING FLOWERS

HARDY OUTDOOR STRAINS

To have stocky Pansy Plants covered with giant flowers next spring, the plants must be planted this fall, preferably in early October in the north and mid November further south. Plants will be ready from Oct. 1st on. Many of the plants we send out this fall will be in bud and some in bloom. In a mild winter, you will have pansies in bloom all winter through.

GLORIOUS ORIENTAL POPPIES

LARGE 2-YEAR-OLD FIELD GROWN PLANTS THAT WILL BLOOM JUNE, 1962

Poppies Delivered Sept. 1st to Nov. 1st

Oriental Poppies are very easy to grow, provided you remember one or two peculiarities. Natives of a semi arid part of the world, they will not tolerate wet feet or shade. They bloom in June and July, then go into a dormant period losing their foliage entirely during most of August and September. Oriental Poppies prefer a lime soil. While they are dormant and through October is the best time to transplant large field grown poppies.

60c EACH ANY 3 FOR $1.69

OP5 **BARR'S WHITE**—Lovely large white with purple-black blotches at the base. Early flowering.

OP22 **CARNIVAL**—Giant crinkled flowers on stiff stems. Upper half of bloom carmine red, lower half white. Very distinctive.

OP23 **CHERRY TIME**—About the first to bloom. Large bright cherry red flowers.

OP4 **CURTIS GIANT SALMON** — Tremendous, long stemmed flowers of a clear bright salmon color.

OP8 **CURTIS GIANT MAHOGANY**—A real giant with crinkled petals. Deep reddish mahogany.

OP3 **FIELD MARSHAL VON DER GLOTZ**—A European introduction. Very vigorous grower. Flowers large crinkly white with black base.

OP24 **CURTIS GIANT MULBERRY**—A new poppy of great size with crinkled mulberry lavender flowers. Unique.

OP9 **GLOWING EMBERS**—A fine garden poppy with flowers of deep crimson. Easy and sure to flower.

OP10 **HELEN ELIZABETH**—Soft light pink flowers. This is the easiest of all Oriental Poppies to grow.

OP13 **ORANGE PERFECTION**—Large stiff stems crowned with giant flowers of burnt orange.

OP12 **RIDGEWOOD BEAUTY**—Bright clear geranium pink crinkled flowers on long sturdy stems.

OP25 **WAR LORD**—A magnificent new plant with deep blood red flowers of startling texture and size.

TWO NATIONAL FAVORITES

ROCKNOLL'S *Magnificent* CREEPING PHLOX

F17 (Phlox subulata or Moss Phlox)

8 PLANTS for $1.00 Assorted Colors

Plant Rocknoll's magnificent creeping phlox subulata this Fall, to become well established for glorious early Spring rainbow display that lasts for weeks. Over large or small areas of rock gardens, beds and borders it forms blankets of many colors . . . red, steel blue, wine red, white, pink, rose. Phlox subulata is one of the nation's great favorites, and these improved strains show it at its best. As versatile as it is beautiful, this sturdy evergreen plant thrives in average sunny garden soil. In cooler areas, some blooms appear all Summer long, even into Fall. Really fine field-grown plants at bargain prices. Plant this Fall for best results; 8 to 12 inches apart. Shipped through October, with planting instructions.

Plant Early Fall for Best Spring Blooms
The more pansies you pick, the more they bloom!

THEY'RE GIANTS! They're delightfully colorful! They're hardy! Set out a big bed of these Swiss Giant Pansies; they'll establish themselves this fall and burst into magnificent display even before the daffodils start swaying next spring. Given a cool, moist location and kept picked, these pansies' big cheery round faces will peer up at you for months.

This is a fine hardy giant strain of one of the world's most beloved garden flowers, with blooms five inches around, at special prices that enable you to enjoy them in big colorful beds.

Order yours now for delivery in cool weather of early October, when sturdiest plants are available. That's when nurseries transplant and establish their own stocks for easy wintering and magnificent spring blooms. Prepare permanent rich bed now or reserve cold frame space. Planting instructions sent.
